Creative Problem Solving skills

Good afternoon everyone, Kate's Corner

The evenings are dark and the weather has been very wet! But college has still been busy and full of activity. This week there have been cinema visits, farm engagement and music fun.

		and					
Dark	evenings		wet	weather	won't	stop	us
		and					
being	busy		doing	lots of	activities	at	College!

Thursday was our Futures Fayre and it was great to meet so many parents with children in Years 10 and 11, excited about the opportunities that their young people could have in the future, as part of our community. To follow on from this, some of our college and Year 11 classes mixed today and it was great to see them benefitting hugely from each other's company and having fun!

Have a nice weekend,
Kate

This week M16 have been practicing our fine motor skills by doing origami, we made a heart and a scotty dog! We also went to the cinema again to watch Elemental; we used good sharing skills with our popcorn and sat quietly, engaged in the film.

World HELLO Day

A16 went to Showcase cinema in Southampton as part of the Into Film Festival to see Minions today. We are writing reviews of the films we have seen as part of the festival. Last week we saw The Smeds and the Smoos and wrote some great reviews about our favourite characters and why we liked the film. Daniel enjoyed it because he found it funny and Chardonnay said she liked the main character because she was happy like her.

Skills Builder Challenge

Listening

Watch a video on a topic you are interested in.

What is the main information it tells you?

Watch a video on a topic that you are interested in. After watching the video, take time a moment to think about what you heard and note down the key points covered.

Extension: watch the video again while reading your summary of the key points. Did you note down all of the most important information? If you missed something, add in that information.

fine motor skills in woodwork

D16 have been working on problem solving and fine motor skills in woodwork with Tom.

F16's Student Zone

Problem Solving

F16 have been working hard on our independent living skills and our problem solving.

Harry and Freddie worked hard to make their own rice krispie cakes and did well using the microwave to melt chocolate.

Independent living

determined

George has been getting into some more problem solving with his pebbles work – he has shown resilience throughout.

Everyone in F16 has shown amazing determination, and the ability to problem solve when something doesn't quite go to plan!
